March 16th, 20XX

Dear Technology Application Specialist Search Committee,

I am interested in the position of Technology Application Specialist posted on Handshake by Wayne Technologies. I have the skills, experience, and passion to excel in this position and help Wayne Industries remain the forerunner in Vancouver's growing engineering field. I became interested in Wayne Technologies after speaking with a representative from your organization at the Spring 20XX Career and Internship Fair. Working with a company whose focus is on pushing the boundaries of innovation and making products that are user friendly are two passions of mine.

I am a senior at Washington State University Vancouver, who will be receiving a Bachelor of Science in Electrical Engineering in May 20XX. For my Capstone project, I am leading a group of 4 fellow students on implementing voice operated exchange (VOX) technology to aid in the communication of automotive review efficiency. In order to find the right platform to display review results compatible with Wayne Automotive's newest car models, I suggested that we become familiar with 5 different computer software programs to find the perfect fit. Through our research we discovered the Firefly program and found it to be the most capable. Going the extra mile to make sure everything is working at optimum efficiency for both creator and user is important to me and is in line with Wayne Technologies mission.

It is important for me to maintain a real-world perspective for my passions and educational experiences. To do this, I have applied for scholarships in my area of study and was employed as a summer Electrical Engineering Intern at Farris Air in 20XX. Working with a team of senior engineers, I was responsible for categorizing and ordering new parts, organizing and managing large scale shipment schedules, and designing a functional electronic system for a robot made out of leftover materials. While challenging, I relished the opportunity to push the boundaries of design with limited resources and gain the skills needed to support a company.

With my skills, I will bring a fresh perspective, experience, and passion to Wayne Technologies, helping build a better tomorrow for Vancouver. Thank you for your time and consideration. I look forward to meeting you to discuss the Technology Application Specialist position in full, and my experience in more detail.

Sincerely,

Lois Layne
